HEART OF THE ALPS

*It all starts from rain and snowfall
infiltrating in the mountains around
Lake Como.*

A REMARKABLE JOURNEY

*Slowly flowing through deep glacial
rocks for 65 years, it is naturally
protected on its journey to the spring
in Mariano Comense.*

NATURALLY ALKALINE

*An amazing mineral balance
perfected by nature, for a unique
and velvety taste.*

**CHEMICAL AND PHYSICAL-CHEMICAL
CHARACTERISTICS AT SOURCE**

San Graziانو Natural, lightly sparkling,
sparkling Mineral Water is naturally alkaline.

TDS at 180 °C: 154mg/l

pH at the source: 8.0

Mineral Composition (mg/l)

Calcium
28.2

Magnesium
8.3
